Subject: need OSC for ITC water ops
Date: Thursday, March 21, 2019 1:48:41 PM

All – at this time, we have 3 OSCs (Adam, Steve and Matt) working in Houston on the ITC incident. Due to the ITC incident, Steve has volunteered to stay in Houston to cover the night shift responsibilities and to help Adam with local coordination. Matt will continue to help with daily reporting responsibilities. With Steve staying in Houston, Paige has volunteered to make the 3 presentations at the RRT Steve was scheduled to make.

Since we are starting up water ops today, Adam has requested an additional OSC to oversee water ops. FYI - We are increasing our air monitoring activities today, with the arrival of the TAGA and ASPECT continues to fly. May need additional OSCs in the days to come.

Let me know if you are available to deploy to help with the water Ops oversight activities. Need someone to mobilize today to take over water operations tomorrow. Know some of you are heading out on travel next week or are on leave or taking leave. All OSCs on this email are expected to respond.
